Dear Mr. Jones:

This is in response to your letter of July 2 regarding your request for information on NCR Fanapart padding compound for your Material Safety Data Sheet.

The NCR Fanapart Padding Adhesive has been tested by an independent laboratory and has been classified as non-toxic by ingestion and dermal application, is not a primary skin irritant or corrosive material and is not an eye irritant as these terms are defined in the regulations for the Enforcement of the Federal Hazardous Substances Act (Federal Register, Revised, September 17, 1964).

Our lab tests have not detected an open cup flash point on this product.

If you have any questions, or if I can be of further service, please let me know.

Very truly yours,

B. C. Boothby, Jr.  
NCR Paper Technical Services  
(414) 734-9216
